

Class 2 conducts

Project Based Learning on "Water"

Throughout the EVS thematic unit on WATER, our 2nd standard students designed campaign slogans and developed persuasive writing speeches on the causes and effects of water pollution. As a whole group STEAM activity, students were able to discover multiple ways to clean up an oil spill, using tools from the DAIS science lab. During the culminating presentation on "Water", students confidently presented independent projects that involved the stages of the water cycle and the production of electricity through the movement of water. Students also learned about and performed a folk dance in honour of the African Goddess of the Sea entitled "Yemaya". The culminating PBL on water, gave our students a platform to express their voices and advocacy towards a cleaner and healthier planet.
